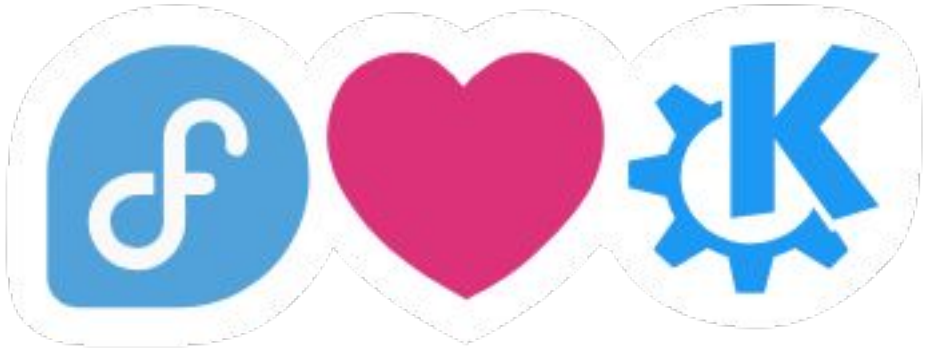
About us...

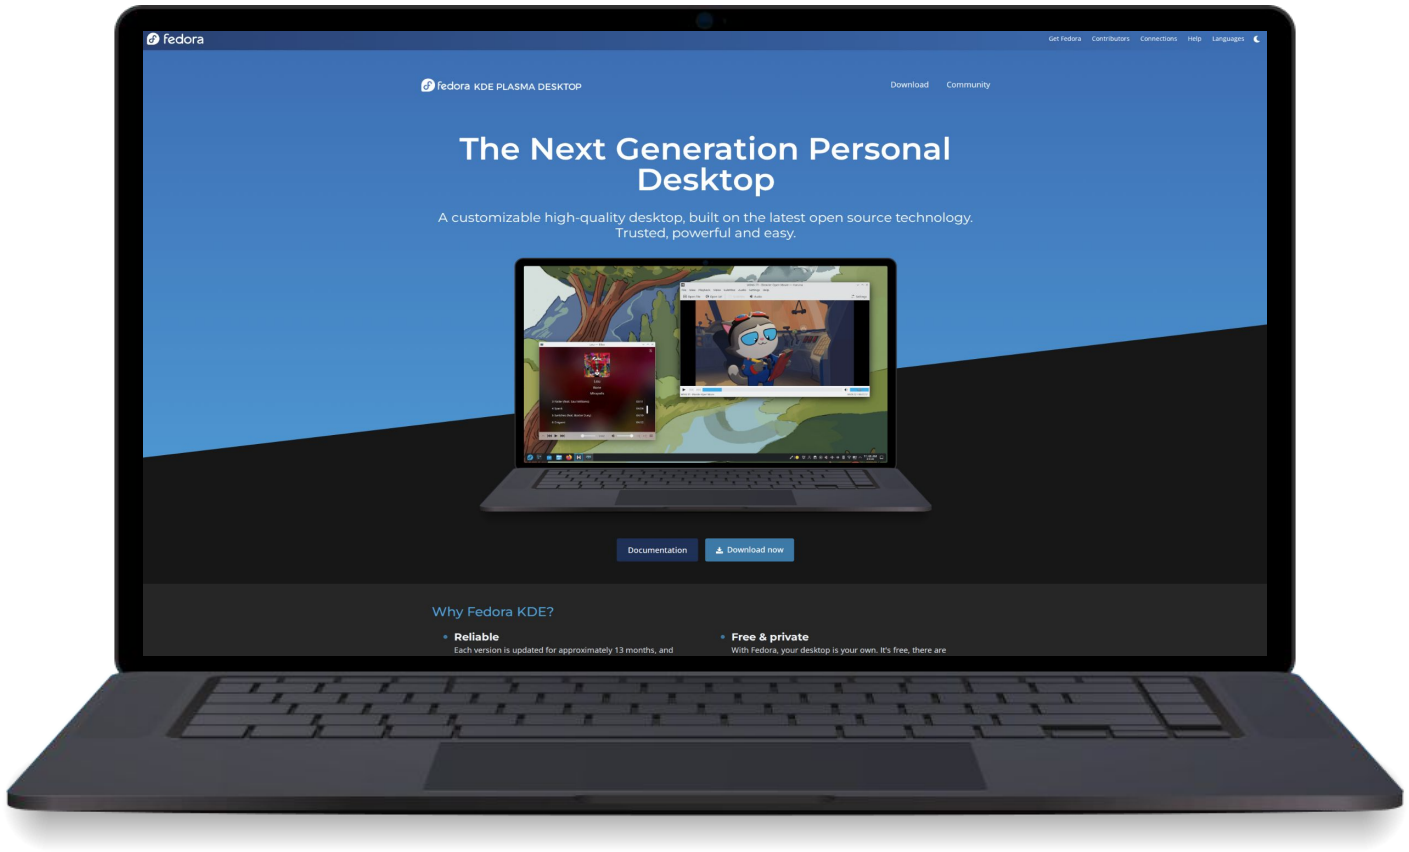
Fedora KDE SIG



- Fedora KDE SIG (Special Interest Group) is a group of Fedora contributors that maintain KDE packages in Fedora, as well as the KDE Plasma Desktop Edition, the KDE Plasma Mobile Spin, and Fedora Kinoite. Their mission is to provide high-quality, usable KDE software packages to Fedora users and developers, and to support one another in maintaining those packages.

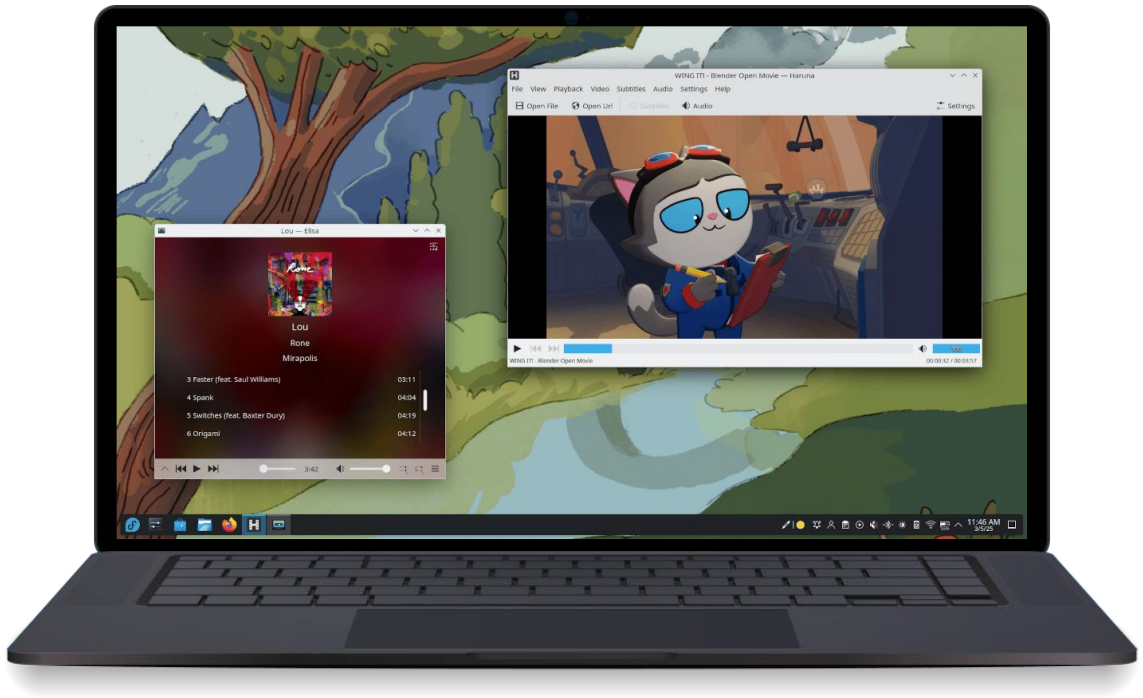
We have a new website !!

https://kde.fedoraproject.org/



Introduction to Fedora KDE

Introduction to Fedora KDE

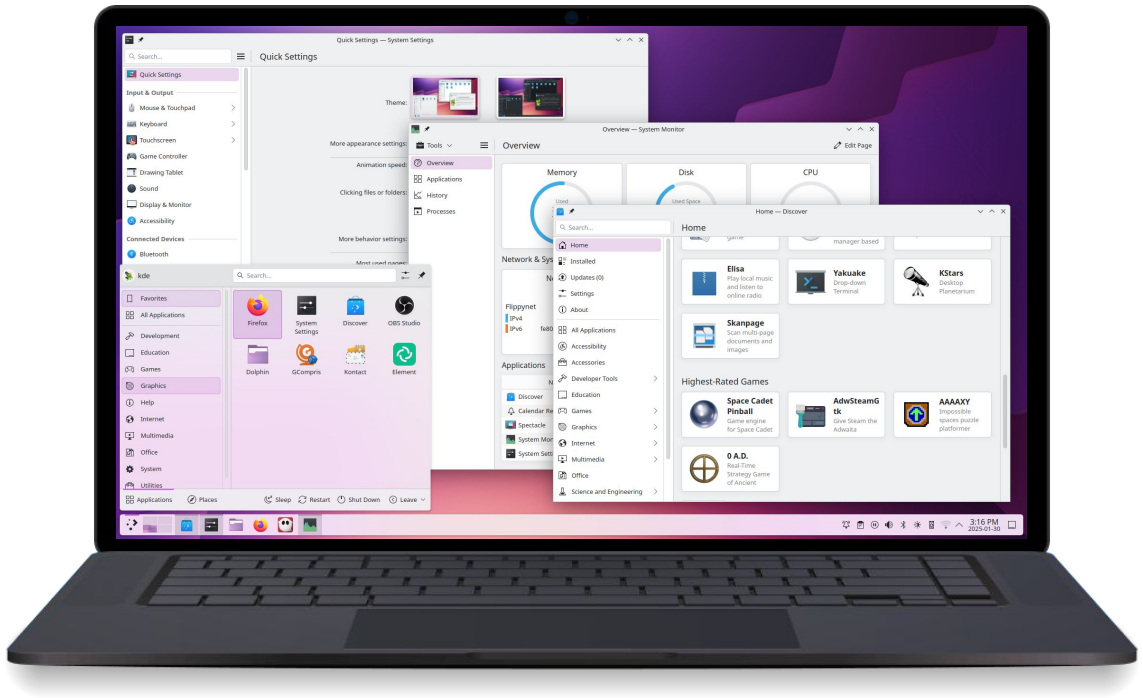


- Fedora Linux: Cutting-edge, community-driven OS
- KDE Plasma: Now a flagship Fedora Edition, woohoo !
- Tailored for creators, developers, scientists, and gamers
- Emphasis on simplicity and power

fedora
KDE PLASMA DESKTOP

New KDE Plasma 6.3

KDE Plasma 6.3 Highlights



- Latest release: Plasma 6.3.4
- Enhanced drawing tablet configuration, better screen area mapping, calibrations and more.
- Improved fractional scaling for sharper visuals
- Advanced system monitoring tools
- Accurate color management with Night Light support

Fedora KDE on Power Systems

Fedora KDE on Power Systems

- Fedora KDE expands to Power Systems architecture.
- Thanks to **Dan Horák** enabled full KDE stack support for Power Arch.
- Live images available for OpenPOWER systems like Talos.
- Support is best-effort, not release-blocking for Fedora.

Fedora KDE
X86_64 Emulation
On ARM-based devices (AArch64)

x86 Emulation on ARM Devices

- Fedora KDE expands usability on ARM-based (AArch64) devices.
- x86 emulation is powered by FEX, integrated by contributors.
- x86_64 applications now work on ARM with a Fedora FEX rootfs image.
- Optimized to run Windows or Steam applications on ARM.

More Updates !!
For Testers !!
For Beta Users !!

KDE Plasma 6.4 Beta Release - A Sneak Peek

- **Time-of-Day Wallpapers:** Dynamic wallpapers that change based on the time, enhancing visual appeal.
- **Spectacle Revamp:** Major UI overhaul for the screenshot utility, offering a more intuitive experience.
- **Per-Virtual-Desktop Tiling:** Customize window layouts for each virtual desktop individually.
- **Aurorae Theme Engine:** Enhanced support for window decorations, allowing for more customization.

Get involved
Join Us !

How you can contribute

- Introduce yourself on Matrix or say Hi at one of our weekly meetings
- You can help upstream kde projects
- You can help us with packaging.
- Make your first issue ticket or pull request in our pagure
- Join for `weekly kde-sig` meetings
